

Pharmacovigilance

EXPERIENCE. EXPERTISE. STRATEGIC NETWORK

MULTIDISCIPLINARY PROJECT TEAMS TO COVER ALL PHARMACOVIGILANCE NEEDS

PM Clinical has pharmacovigilance experts with 25+ years of experience that can cover all bases in drug safety – from **safety data management** to **case reporting** and **document drafting** to **system implementation** and **IT infrastructure management** – to provide a full service pharmacovigilance solution.

SYSTEM IMPLEMENTATION & HOSTING:

-  User Requirements defined by a team of Business & IT Analysts
-  Configuration, Testing and Implementation for full system validation and maintenance
-  Business Continuity & Disaster Recovery

CASE PROCESSING:

-  Case Collection, Data Entry and Coding
-  Query Management
-  Reporting to Eudravigilance and other authorities

SIGNAL DETECTION & REPORTING:

-  Periodic Reporting: PSURs, DSURs, Listings
-  Literature Screening and Data Mining
-  Risk Management Plan
-  Ad hoc reporting using Data Visualization tools

PSMF Management

PM Clinical can guarantee successful PSMF preparation through a cross-functional team with expertise in preparation, maintenance and document management and archiving and a strong network of QPPV experts.
